

SUMMARY OF DOCTORAL THESIS

I. INTRODUCTION

1. PhD student: Doan Thi Thu
2. Thesis title: Research to improve the organization and operation model of school libraries in Ho Chi Minh City
3. Major: Library and Information Science
4. Code: 62320203
5. Higher education institution: Hanoi University of Culture

II. CONTENTS

1. The purpose, object and scope of the thesis research

- Research purposes: basing on surveying and assessing results on actual situation and the current organizational and operational model of school librariys in Ho Chi Minh city, the author proposes solutions to improve the model.

- Research subjects: Model of organization and operation of shool librariys at all 3 levels (including public schools and non-public schools).

- Research scope:

Space scope: in the shool librariys in Ho Chi Minh city (including both urban and suburban areas within the city).

Time range: from 2014 - 2017. This was the time when Ho Chi Minh city implemented Resolution No. 29-NQ/TW dated November 4, 2013 (Resolution of the 8th Central Committee Conference, Course no. XI) on fundamental and comprehensive renovation in education and training.

2. Research method

Methodology: the thesis uses the general methodology including dialectical materialism and historical materialism.

Specific research methods: (1) documentation research, (2) cases study, (3) questionnaire survey, (4) interview, (5) observation, (6) analysis and statistics, (7) modeling.

3. The main results of the thesis

-Research has contributed to systematizing the theoretical basis of the organization and operation of the school library.

- The thesis has surveyed the current status of organization and operation of school library and control among school blocks: public school, Vietnamese public schools and non-public schools have foreign elements in Ho Chi Minh city.

- The thesis has identifying organizational and operational model of school librarys in Ho Chi Minh city.

- The thesis has proposed solutions to improve the organization and operation model for school libraries in Ho Chi Minh city with the implementation order and conditions for each school block.

4. Scientific and practical significance

Theoretical significance: The thesis contributes to enriching the theoretical basis of the organization and operation of school library.

Practical significance:

- The thesis sheds light on the situation of organization and operation of school librarys, proposes solutions to improve the model, suitable for school librarys in Ho Chi Minh city. If applied, this model will help improve the operational efficiency of school librarys in Ho Chi Minh city.

- The thesis can be a reference for training institutions as well as for researchers in field of Library Information Studies.
