The new contributions of the doctoral thesis

1. The thesis is the first detailed and systematic research about the information resources of the public library system in Vietnam, which contributes to codify and clarify the theory and practice for the development of information resources: information resources for the public library system in Vietnam.

2. The thesis studies the real situation and clarifies the strengths and weaknesses of the development of information resources to meet the information needs of users at public libraries which contributes to fully identify the source of information resources of the public library system in Vietnam.

3. The thesis proposes a model of information resources development and the feasible solutions to ensure the development of quality and efficiency information resources, meet the needs of users and enhance the social status of the public library system in Vietnam.
